

# LOST LAKE UTILITY DISTRICT - Water & Sewer Management

Summer 2025

## Meet our New Chair and Vice Chair

Linda Repesh began her first-year term as Chair on May 1<sup>st</sup>. This month also marks her seventh year living at Lost Lake, having relocated from Michigan. Linda brings over 30 years of experience as an Industrial Hygienist, including global leadership roles in the manufacturing sector. She is an active member of Lost Lake Social Club

and enjoys outdoor activities, such as walking dogs, landscaping, and golfing at the beautiful Lost Nation Golf Course.

Judith A Plum (Judy) moved to this beautiful area over 5 year ago with her husband Bill. She worked in nursing for over 45 years, mostly in Orthopedic surgery, completing the last 20 years as a Director of Nursing for Ambulatory Surgery Centers. They are proud parents and grandparents. Another dog lover, you might see Judy walking her spaniel dog, Woodrow.

LLUD Board is looking forward to seeing the new anticipated upgrades happening to the Utility this Summer. The skyline will be changing around Lost Lake. Our iconic water tower is getting a paint job. And, the waste water treatment plant is getting an overhaul. It will be a busy summer around here.

## Stop In and Say Hi to Our New Office Manager!

Beth Caudill's last day as Office Manager was April 30th. The Board greatly appreciates all that Beth has done for the Utility. She will be missed. But don't worry, she's still active in the POA and RCD. Beth did a great job training the Utility's new Office Manager, Julie Peters. Julie has worked for the District since 2019 as the Treasurer. When

this opportunity came up, Julie didn't hesitate to apply. She is looking forward to getting to know the community better and assisting the Utility with the major projects that are happening this year. The office hours are Tuesday, Wednesday, and Thursday 9:00am-5:00pm. And don't worry, the candy bowl will always be filled with mints.

## New Meter Upgrades are Still Available

The new cellular meter would allow you, the customer, to monitor your real-time usage. You can track your water usage, identify potential problems, track water conservation efforts, and even receive alerts if your water usage is too high. With Eye on Water, you'll have peace of mind knowing your water is being used responsibly. You will have the ability to stop leaks as soon as they happen, instead of being surprised by a large water bill.

We have limited number of new meters on hand. The water meter upgrade application is available at our website at [www.LLUD.org](http://www.LLUD.org) or at our office at Lake Court Center.

Our Annual Drinking Water Quality Report for Lost Lake Utility District IL1415100 for the period of January 1 to December 31, 2024 is now available at <https://ccrwater.net/llud-211333>.
